

Task 1: Create an S3 Bucket

Steps

1. Log in to the AWS Management Console.
2. Search for S3.
3. Select S3.
4. Click Create bucket.
5. Enter a globally unique bucket name.
 - Example:
 - nishit-cloud-20261008
6. Select the region:
 - Asia Pacific (Mumbai) – ap-south-1
7. Keep Block all public access enabled initially.
8. Keep the remaining settings at their default values.
9. Click Create bucket.

Task 2: Upload Three Different Files

Upload:

1. An image file
instagram-profile.png
2. A PDF file
spotify-playlist.pdf
3. A text file
zomato-menu.txt

Steps

1. Open the S3 bucket.
2. Click Upload.
3. Click Add files.
4. Select the three files.
5. Click Upload.
6. Verify that all three files appear in the bucket.

Task 3: Make an Object Public

Steps

1. Open the S3 bucket.
2. Select instagram-profile.png.
3. Open Permissions.
4. If required, adjust the bucket's Block Public Access settings.
5. Configure an appropriate bucket/object policy allowing public GetObject access.
6. Save the changes.
7. Open the object's Properties.
8. Copy the Object URL.
9. Open the URL in a browser.

Task 4: Enable S3 Versioning

Steps

1. Open the S3 bucket.
2. Go to Properties.
3. Find Bucket Versioning.
4. Click Enable.
5. Save the configuration.

Now upload a modified version of:

- zomato-menu.txt

For example, change the content from:

Pizza - ₹199

Burger - ₹149

to:

Pizza - ₹199

Burger - ₹149

Biryani - ₹249

Upload the file again using the same filename.

Verification

1. Open the bucket.
2. Enable Show versions.
3. Locate zomato-menu.txt.
4. Verify that two versions are available.

Task 5: S3 vs EBS vs Glacier

Amazon S3 is object storage designed for files and application data, while EBS is block storage that acts like a virtual disk attached to an EC2 instance. S3 Glacier is designed for low-cost long-term archival and infrequently accessed data. I would use S3 for Instagram profile pictures, EBS for an application/database that processes Flipkart order data, and Glacier for old IRCTC booking records because each storage service is optimized for a different access pattern.

Application	Recommended Storage	Reason
Instagram profile pictures	S3	Scalable object storage and easy retrieval
Flipkart order processing	EBS	Suitable for application/database workloads
Old IRCTC booking records	Glacier	Low-cost long-term archival
