

Task 1: Create my-zomato-images

Create a bucket such as:

- my-zomato-images-nishit-2026

Upload three sample restaurant images:

- pizza.jpg
- burger.jpg
- biryani.jpg

Task 2: Lifecycle Rule – Move Objects to Glacier

Steps

1. Open the S3 bucket.
2. Go to Management.
3. Select Create lifecycle rule.
4. Enter:
 - Rule name:
 - MoveToGlacierAfter30Days
5. Apply the rule to all objects.
6. Add a transition action.
7. Select an appropriate Glacier storage class.
8. Set the transition to 30 days after object creation.
9. Save the rule.

Task 3: Cost Optimization

For the assignment, compare approximately 5 GB of storage in:

- S3 Standard
- S3 Glacier storage class

Use the AWS Pricing Calculator and record the current Mumbai-region estimate.

Your report can use this format:

Storage	Data	Estimated Monthly Cost
S3 Standard	5 GB	₹ _____
S3 Glacier	5 GB	₹ _____
Estimated Difference	5 GB	₹ _____

Task 4: Delete offers/ Objects After 60 Days

Create another lifecycle rule.

Rule name:

- DeleteOffersAfter60Days

Filter/prefix:

- offers/

Action:

- Expire/delete objects after 60 days.

Example object:

- offers/summer2024.jpg

Task 5: Lifecycle JSON

Sample S3 lifecycle configuration:

```
{
  "Rules": [
    {
      "ID": "ArchiveAndDelete",
      "Status": "Enabled",
      "Filter": {},
      "Transitions": [
        {
          "Days": 15,
          "StorageClass": "GLACIER"
        }
      ]
    }
  ]
}
```

```
    }  
  ],  
  "Expiration": {  
    "Days": 180  
  }  
}  
]  
}
```
